Subject: Microsoft Settlement

I am addressing the people who find fault with Microsoft. If it were not for Bill Gates and his company Microsoft I would never have purchased a computer in the first place. Because of his genius and foresight to make the computer easy to use and understand I am now learning more and using the computer everyday. I plan to take a course at my local High School and try to get a job paying more than the minimum wage. I thought the American Way was to let the average citizen develop a product find a way to sell it and make a profit. I see the phone companies doing it the cable company has total control over us and PA and no-one is even bothering to look into their business. For instance a Walgreen just opened right down the street from and Eckerd Drug and that is called the American Way. Stop Netscape and whoever else has a problem with Microsoft& Bill Gates moving ahead with his genius programs and ability to hire the right people to help the average person get ahead. Shame on those that would stop the American Dream.
